

Dear Hiring Manager,

I am writing to express my interest in joining your team, leveraging my extensive experience in backend development, Python, Django, and Google Cloud. With a Bachelor of Science in Computer Science from BRAC University and a solid track record of working with cloud-based solutions and microservices architecture, I believe I can make a meaningful contribution to your team.

Throughout my career, I have developed backend microservices using Python and Django across various industries, most recently for Nash fintechX, where I built multi-tenant applications for blockchain marketplaces. My expertise in Google Cloud Platform (GCP) technologies, including Cloud Run, Cloud Functions, Cloud Storage, and CI/CD pipeline automation, enables me to efficiently deploy and manage scalable applications.

At UDPlatforms Inc., I played a crucial role in developing microservices for a no/low-code platform, deploying these services using GCP's serverless architecture and automating the build and release processes. This experience, combined with my knowledge of infrastructure tools like Docker and GCP, equips me to deliver robust, scalable, and secure cloud-based solutions. I also have experience mentoring junior developers, helping them improve their Python skills and adhere to software engineering principles like SOLID and TDD.

I am confident that my blend of technical skills, hands-on experience with Google Cloud services, and a passion for continuous improvement would be a valuable asset to your team. I am excited about the opportunity to contribute to the project and look forward to discussing how I can support your company's growth and success.

Sincerely,

Omar Hasan
